Introduction

The annual revision of the *Waterborne Transportation Lines of the United States* (**WTLUS**) contains summary information of the vessel companies and their American flagged vessels operating or available for operation on 31 December 2023 including updates through 30 January 2025 in the transportation of freight and passengers. Ferry operators and their vessels' characteristics are included. Floating equipment used in construction work, such as dredges, pile drivers, and flats; fishing vessels; and recreational crafts are not included. The **WTLUS** is prepared under authority contained in the Rivers and Harbors Appropriations Act approved 22 September 1922 (42 Stat. 1043), as amended, and codified in 33 U.S.C. 555.

The [National Summaries](#) is a section of the annual revision of the **WTLUS**, which provides a condensation of the vessel data detailed in the **WTLUS**. Summarized vessel characteristics are represented in both tabular and graphic format. This section corresponds to Volume 1 of the previous versions published by the Waterborne Commerce Statistics Center.

The [U.S. Flagged Vessels by TS Operator](#) section lists the vessel companies, transportation series (TS) operators, in alphabetical sequence, and describes each vessel surveyed by indicating its owner assigned name and number, Coast Guard Number, net tonnage, type by description and ICST code (International Classification of Ships by Type; see Appendix for [ICST](#)), register length, overall length, overall breadth, register breadth, loaded draft and light draft, horsepower, cargo carrying capacity in short tons and number of passengers, height of fixed superstructures, cargo handling equipment, operating headquarters, and year built or rebuilt. Detailed vessel characteristics may not be available for all vessels included in the total **WTLUS** vessel inventory.

The [U.S. Flagged Vessels by TS Operator](#) section also provides a summary of the vessel companies currently operating. The names of the vessel companies are listed alphabetically with

their business address and telephone number, the Engineer District number in which the company unit is located in, the TS Operator (vessel company) number (for usage in querying computer data and disambiguation of similarly named companies or company divisions), principal commodities carried, the points or localities and waterways between which or on which the company operates, and the number of vessels reported by vessel type.

The vessel data is available on-line through the Navigation and Civil Works Decision Support Center (NDC), formerly the Navigation Data Center website at www.iwr.usace.army.mil/About/Technical-Centers/WCSC-Waterborne-Commerce-Statistics-Center-2/WCSC-Vessel-Characteristics/. Ordering information is available from the Waterborne Commerce Statistics Center, P.O. Box 61280, New Orleans, LA 70161-1280. (FAX 504/862-1423).

The **WTLUS** publication is a by-product of the Waterborne Commerce Statistics Center (WCSC) Master Vessel File. The annual survey would be done even if there were no **WTLUS** publication because the survey is a necessary and integral part of the WCSC enforcement and collection program. Tracking vessel owners and operators is the primary means of identifying non-reporting carriers and new vessel operating companies.

This version is a departure from previous volumes in that this document is now one linked volume rather than three discontinuous volumes. The vessel descriptions were also changed into a more natural English language style rather than a list of codes. The intent of these changes are to make the document easier to read and use.

National Summaries

Summary of U.S. Flagged Vessels by Region

For historical reasons the United States vessel inventory has been divided into three regions. The largest region by number of vessels contained is the Inland Region consisting of the Mississippi River System and the Gulf Intracoastal Waterway (GIWW). The next largest region by number of vessels is the Coastal Region containing vessels based on the Gulf, Atlantic, and Pacific Coasts. The third, significantly smaller, region ranked by vessels contained is the Great Lakes region. The percentage of total vessels engaged in commerce, not including fishing, is displayed in Figure 1a. There were 36,323 vessels in the Inland Region, 9,024 vessels in the Coastal Region, and 590 vessels in the Great Lakes Region. Figure 1b shows the distribution of self-propelled vessels among the same regions with 5,993 vessels in the Inland Region, 4,126 vessels in the Coastal Region, and 388 vessels in the Great Lakes Region. Likewise, Figure 1c shows non self-propelled vessels by these regions with 30,201 vessels in the Inland Region, 4,830 vessels in the Coastal Region, and 202 vessels in the Great Lakes Region. Note regionally classified vessels do not equal total vessels as some vessels regional status is unknown.

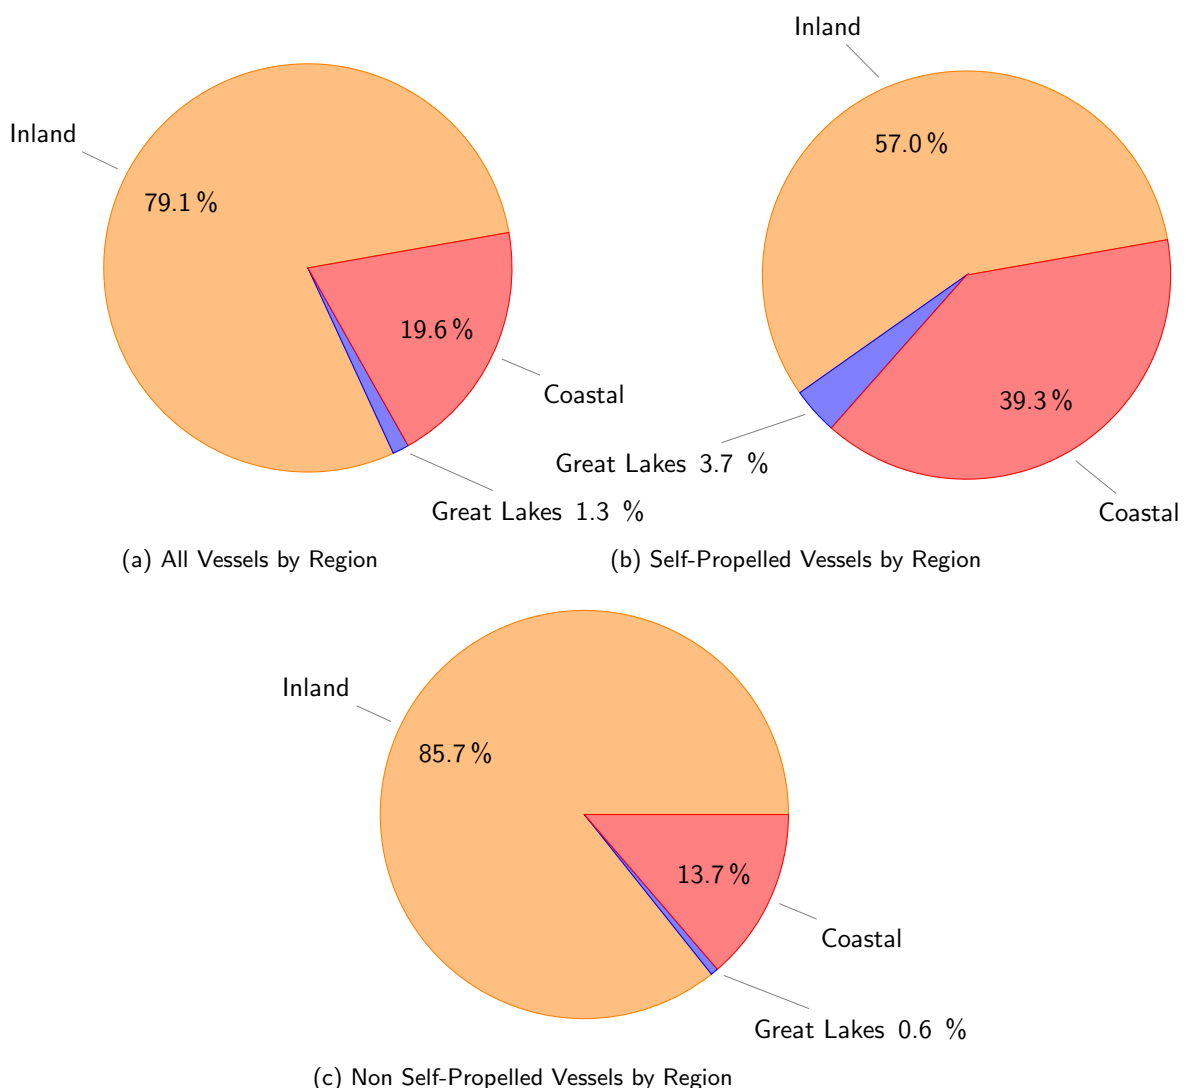

Figure 1: U.S. Flagged Vessels Categorized by Region.

Summary of U.S. Flagged Vessels by Type of Vessel

Figure 2 shows the self-propelled vessels aggregated by type. These include the following categories tugboat, push boat, tanker, passenger, dry cargo, offshore supply, and container. The definitions of each type can be found in the glossary by paging to it or clicking on the link corresponding to the type. Occasionally, types may be aggregated. For example, tugboats and push boats may be combined into towboats. Figure 3 displays the non self-propelled vessels divided by type. These are divided into tank barge, deck barge, dry open barge, dry covered barge, and other dry barge. Below Table 1 summarizes the information presented in the figures, organized by region.

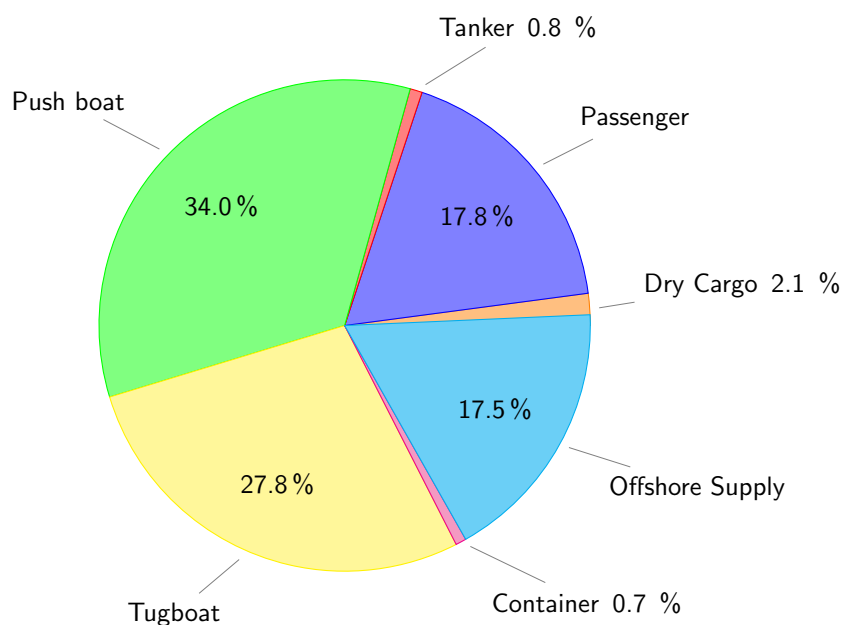

Figure 2: All U.S. Flagged Self-Propelled Vessels by Type

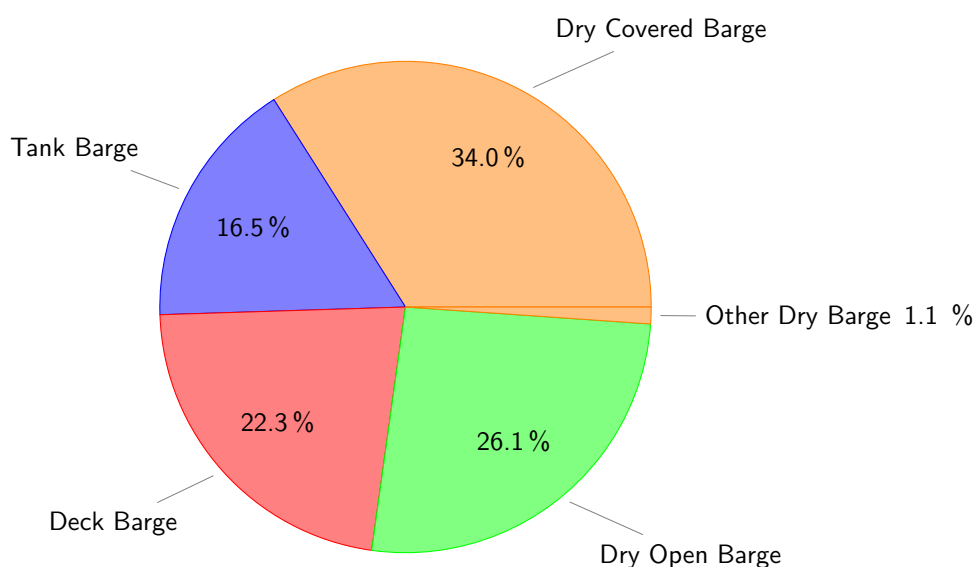

Figure 3: All U.S. Flagged Non Self-Propelled Vessels by Type

U.S. Flagged Vessels by Type

Table 1: Includes U.S. flagged vessels operating and/or available for operation December 31, 2023 updated through January 2025. Vessels primarily used as fishing vessels or dredges or derricks, etc., used in construction work are excluded.

Summary of U.S. Flagged Vessels Operating or Available by Year

For a recent historical perspective on the U.S. flagged fleet Table 2 and Figure 4 display the entire fleet for a selected group of years from 2003 to 2023. These sums are exclusive of fishing vessels, dredges, and derricks, etc., used in construction work. In Table 2 the self-propelled dry cargo category contains all general cargo freighters, break bulk carriers, roll-on roll-off vessels, bulk carriers, and container vessels. The dry cargo category contains all barges that are not deck barges and do not carry liquid contents.

Table 2: Summary of the United States Vessels by Year

Summary of U.S. Flagged Vessels by Age

The next group of figures and tables illustrate the age profile of the U.S. flagged vessel inventory. Table 3 contains all newly built vessels, as well as all rebuilt vessels, during the past ten years. Figure 5 displays the newly constructed vessels comparing totals by propulsion type over the last ten years. Figure 6 compares the number of newly constructed self-propelled vessels per year for different vessel types. Likewise, Figure 7 shows non self-propelled vessels newly constructed by type and year. Table 4 displays the age of the entire fleet. For these figures and tables, the age in years is calculated by subtracting the year the vessel was built or last rebuilt from the base year. For this publication the base year is 2023. Figure 8 compares the total vessels, self-propelled vessels, and non self-propelled vessels by age categories. These categories are subdivided into vessel types in Figure 9 for self-propelled and Figure 10 for non self-propelled.

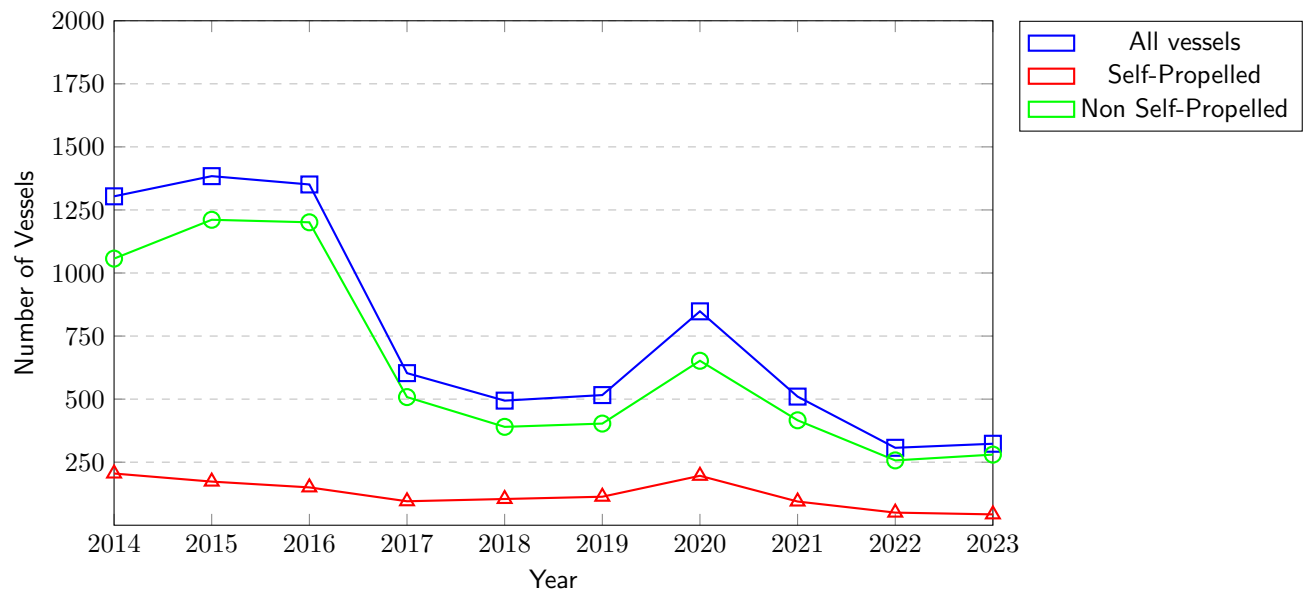

Figure 5: New Construction of Vessels by Type per Year

Summary of U.S. Flagged Vessels by Horsepower

Table 5 lists towboats and push boats by horsepower. In this publication, horsepower rating is reported when the vessel was new or when the present engine was installed. Average horsepower is calculated from only those vessels with known horsepower and not the total number of vessels. Similarly, the total number of vessels is greater than the sum because some vessels with unknown horsepower are not listed in a row. Vessel age is based upon the year the vessel was built or rebuilt as in the previous subsection. Average age is calculated using vessels with a known age, and all vessels with an unknown age will assume an estimated age of forty. Figure 11 presents the same data graphically.

Towboat Horsepower Class	Vessels		Horsepower			Average Age
	Number	% Total	Total	% Total	Average	
Under 500	589	9.1	201,589	0.3	342	48.7
500-1000	1,499	23.1	1,181,581	1.6	788	44.8

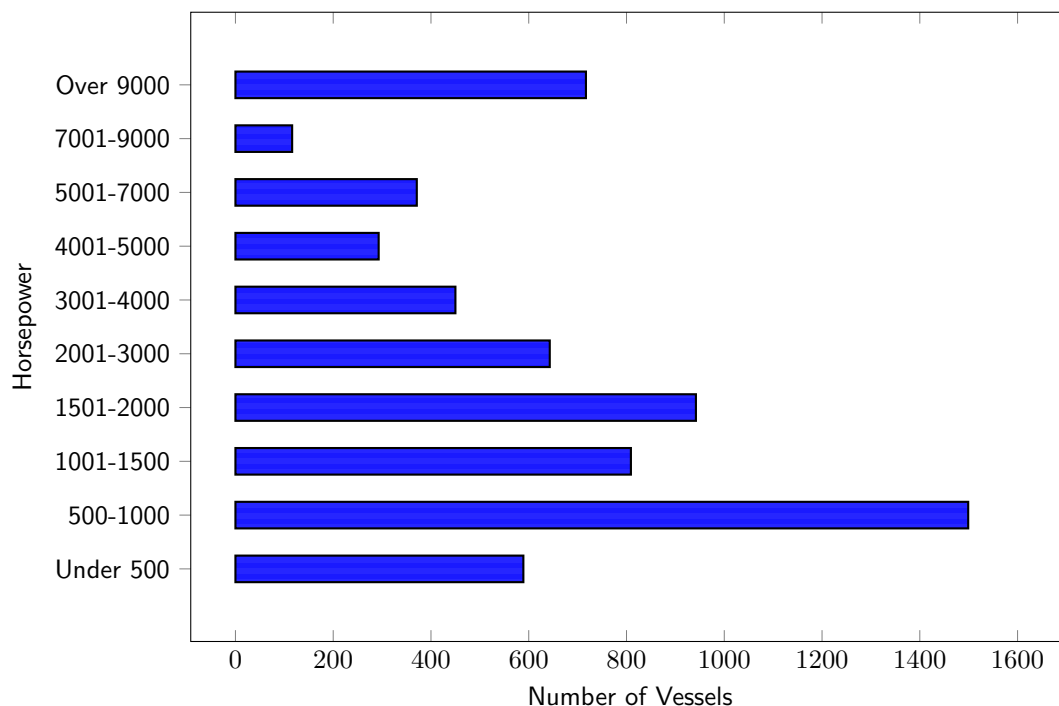

Figure 11: Towboat fleet by Horsepower for 2023

Summary of U.S. Flagged Tank Barge Fleet

Figure 12 depicts all tank barges by size and type. In these figures and tables, size refers to the overall length and breadth of the vessel in feet rounded to the nearest foot. Capacity specifies the full load capacity in short tons (2000 pounds). Other Tank Barge includes barges that are double sided only, double bottom only, or do not fit the other categories. Table 6 presents the same information in tabular form. Figure 13 depicts all shallow draft tank barges by size and type. Vessels with drafts of less than fourteen feet are considered to be shallow draft vessels. Table 7 presents the same information tabularly. Table 8 examines the deep draft tank fleet and these vessels with draft over fourteen feet are depicted graphically in Figure 14.

Table 8: Summary of the United States Deep Draft Tank Barge Fleet by Barge Type and Size for 2023

Summary of U.S. Flagged Dry Barge Fleet

This section contains graphs and tables illustrating the commercial dry barge fleet of the United States. Figure 15 provides an overview of the dry covered barge fleet by size, and Figure 16 provides an overview of the dry open barge fleet by size. Similarly, Figure 18 categorizes the deck barges by size, and Figure 17 categorizes all other dry barges by size. Barges categorized as Dry Other Barges include rail road barges, container barges, roll-on roll-off barges, and convertible barges. Table 9 summarizes the information in these figures, as well as, lists the cargo capacity by type and size, and the average age by type and size.

The next series of tables and figures subdivide the dry barge fleet into shallow and deep draft fleets. The deep draft fleet members are those barges with a loaded draft of fourteen feet or more. The shallow dry barge fleet is depicted in Table 10 and Figures 19, 20, 21, and 22. The deep draft dry barge fleet is shown in Table 11 and Figures 23, 24, 25, and 26.

Table 12: Summary of the United States Shallow and Deep Draft by Vessel for 2023

U.S. Flagged Vessels Operating, Ferry Fleet, and Ownership by State

Table 13 compares the number of vessels available by type to the number reporting as operating by type. Vessels are considered available for operation if they have been reported in the transportation survey, Waterborne Transportation Lines (WTLUS) Annual Questionnaire, as active commercial vessels. Vessels are marked as operating if they have been reported on at least one Vessel Operating Report (VOR) submitted to USACE for the year 2023. Total Operating Vessel Companies aggregates the number of operating companies who listed that type of vessel on a VOR report for the year 2023. Table 14 summarizes the U.S. passenger fleet by passenger capacity. The average horsepower is calculated using only the vessels with known horsepower. Table 15 provides the total number of commercial vessels belonging to companies or individuals located within each state or territory of the United States.

Vessel Type	Vessels Available WTLUS	Vessels Operating (VOR)	% Operating	Total Operating Vessel Companies
Vessel (total)	45,740	29,291	64.0	400

Table 15: Summary of the United States Fleet by State or Territory for 2023

U.S. Flagged Vessels by Transportation Series Operator

The following subsections summarize the U.S. flagged fleets of vessel owners currently engaged in waterborne commerce. The owners are presented in alphabetical order and indexed in the table of contents. Below the operator's name the Corps of Engineers District containing the owner's address is listed. This is followed by the owner's contact information. After the contact information, a short introduction to the owner's principle commercial activities is printed, if available, followed by its' principle areas of operation. Next, an overview of the types of vessels within the owner's fleet is listed.

After the overview of the owner's operations, there is a table listing the parameters for each vessel associated with the owner grouped by vessel types. The first field contains the present name given to the vessel followed by the ID block. The ID block will contain the United States Coast Guard (USCG) number associated with the vessel if it is known. If the vessel has an assigned International Maritime Organization (IMO) number, the IMO number will be listed on a supplemental line. The year field indicates the year the vessel was built, and if the vessel was rebuilt, the year rebuilt will be listed on a supplemental line. The capacity field contains the cargo capacity in tons for the vessel and/or the passenger capacity of the vessel. If the vessel has both capacities, the passenger capacity will be listed on a supplemental line. The next fields contain the dimensions of the vessel in feet. If the registered length differs from the overall length, the registered length will be listed within brackets. Likewise, if the registered breadth differs from the overall breadth, the registered breadth will be listed within brackets. The H Pt field contains the highest fixed point on the vessel. In the draft column, the loaded draft is always listed first followed by the light draft in brackets, even in the case where they are same. For self-propelled vessels the Hp field contains the rated horsepower of the vessel. If the vessel is not self-propelled, the horsepower is indicated by a '-'. Special equipment attached to the vessel is listed in the equipment column.

166 FLEET, LLC

District:32 Tel: (225) 343-8262x243

Address: P. O. Box 3517;725 Main St., Baton Rouge, LA 70821-3517

Commercial operations include: barge fleetings. Operating Localities include: New Orleans. The operator's fleet grouped by vessel type:

1 Push boat

The following table lists the individual vessels for this operator.

Table 16: Vessels for 166 FLEET, LLC

Name	ID	Year	Cap.	Length	Breadth	H Pt	Draft	Hp	Home Base
Towboat vessels of type Push boat with ICST code 432									
HELEN G	USCG:501485	1965	-	65.0[59.4]	22.0	33.0	8.5[7.5]	1000	Baton Rouge, LA

1759 LIMITED

District:3 Tel: (802) 897-7999

Address: 3143 Richville Road, Whiting, VT 05778

Commercial operations include: passengers. Operating Localities include: New York. The operator's fleet grouped by vessel type:

1 Undefined

1 Ferry

The following table lists the individual vessels for this operator.

AMERICAN COMMERCIAL BARGE LINES

District:18 Tel: (812) 288-0100

Address: P. O. Box 610, Jeffersonville, IN 47130

Commercial operations include: towing. Operating Localities include: Louisville. The operator's fleet grouped by vessel type:

1 Crewboat, Supply, or Utility Vessel

85 Push boat

3 Tugboat

The following table lists the individual vessels for this operator.

AMERICAN CONSTRUCTION CO., INC.

District:36 Tel: (253) 254-0118

Address: 1501 Taylor Way, Tacoma, WA 98421

Commercial operations include: dredging and construction materials. Operating Localities include: Seattle. The operator's fleet grouped by vessel type:

3 Undefined

Length and breadth are overall length in feet with registered dimensions in brackets. Loaded draft and [Light Draft] in feet. Capacity is in tons (t) or passengers (p). Year r indicates year rebuilt.

2 Tugboat

3 Open Hopper Barge

6 Flat/Deck Barge

The following table lists the individual vessels for this operator.

CAMPBELL TRANSPORTATION INC (AEP/RTD)

District:21 Tel: (724) 746-9525

Address: Foxpointe Centre, Building One;201 S Johnson Road, Suite 303, Houston, PA 15342-1351

Commercial operations include: charters to others. Operating Localities include: Pittsburgh. The operator's fleet grouped by vessel type:

3 Push boat

442 Open Hopper Barge

27 Covered Dry Cargo Barge

1 RO-RO Barge

The following table lists the individual vessels for this operator.

CAMPBELL TRANSPORTATION INC (CBC)

District:21 Tel: (724) 746-9525

Address: Foxpointe Centre, Building One;201 S Johnson Road, Suite 303, Houston, PA 15342-1351

Commercial operations include: charters to others. Operating Localities include: Pittsburgh. The operator's fleet grouped by vessel type:

9 Push boat

3 Tugboat

40 Liquid Cargo Barge (Double Hull)

The following table lists the individual vessels for this operator.

Table 706: **Vessels for CAMPBELL TRANSPORTATION INC (CBC)**

Name	ID	Year	Cap.	Length	Breadth	H Pt	Draft	Hp	Home Base
Towboat vessels of type Push boat with ICST code 432									
ANDREA H	USCG:1283050	2018	-	86.4	32.0	41.0	10.0[8.0]	-	Orange, TX

Continued on next page

Length and breadth are overall length in feet with registered dimensions in brackets. Loaded draft and [Light Draft] in feet. Capacity is in tons (t) or passengers (p). Year r indicates year rebuilt.

Self-Propelled Dry Cargo vessels of type Excursion or Sightseeing Vessel with ICST code 351									
SUNBEAM VII	USCG:641434	1981	92t	60.0	18.6	0.0	4.0[3.5]	940	Waterford, CT

CAPT. JOHNNY, INC.

District:11 Tel: (804) 366-2887

Address: Route 1101, Box 565, Deltaville, VA 23043

Commercial operations include: barley, wheat, corn, soybeans and milo. Operating Localities include: Norfolk. The operator's fleet grouped by vessel type:

1 Tugboat

The following table lists the individual vessels for this operator.

Table 733: **Vessels for CAPT. JOHNNY, INC.**

Name	ID	Year	Cap.	Length	Breadth	H Pt	Draft	Hp	Home Base
Towboat vessels of type Tugboat with ICST code 431									
CAPT. JOHNNY	USCG:299649	1965	-	59.5	23.0	0.0	7.0[7.0]	1400	Deltaville, VA

CAPT. LEROY TOWING, LLC

District:33 Tel: (281) 452-3171

Address: P. O. Box 2259, Dayton, TX 77535

Commercial operations include: towing. Operating Localities include: Galveston. The operator's fleet grouped by vessel type:

1 Tugboat

The following table lists the individual vessels for this operator.

Table 734: **Vessels for CAPT. LEROY TOWING, LLC**

Name	ID	Year	Cap.	Length	Breadth	H Pt	Draft	Hp	Home Base
Towboat vessels of type Tugboat with ICST code 431									
CAPT. LEROY	USCG:560543	1974	-	65.0[55.5]	24.0[22.0]	38.0	7.0[2.0]	1000	Houston, TX

CAPT. RUDY, LLC

District:32 Tel: (985) 532-6759

Length and breadth are overall length in feet with registered dimensions in brackets. Loaded draft and [Light Draft] in feet. Capacity is in tons (t) or passengers (p). Year r indicates year rebuilt.

Address: 9712 Highway 1, Lockport, LA 70374

Commercial operations include: oil field equipment. Operating Localities include: New Orleans. The operator's fleet grouped by vessel type:

2 Crewboat, Supply, or Utility Vessel

The following table lists the individual vessels for this operator.

Table 735: **Vessels for CAPT. RUDY, LLC**

Name	ID	Year	Cap.	Length	Breadth	H Pt	Draft	Hp	Home Base
Self-Propelled Dry Cargo vessels of type Crewboat, Supply, or Utility Vessel with ICST code 422

CELEBRATION RIVER CRUISES

District:28 Tel: (309) 764-1952

Address: 2501 River Dr., Moline, IL 61265

Length and breadth are overall length in feet with registered dimensions in brackets. Loaded draft and [Light Draft] in feet. Capacity is in tons (t) or passengers (p). Year r indicates year rebuilt.

Commercial operations include: passengers. Operating Localities include: Rock Island Pk. The operator's fleet grouped by vessel type:

1 Passenger Carrier

1 Tugboat

1 Flat/Deck Barge

The following table lists the individual vessels for this operator.

Table 775: **Vessels for CELEBRATION RIVER CRUISES**

Name	ID	Year	Cap.	Length	Breadth	H Pt	Draft	Hp	Home Base
